Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record disclose a jet mill for the comminution of powdery materials comprising a pressure resistant pancake shaped pulverizing inner casing having at least one first inlet port drilled through a cylindrical wall at a non-perpendicular angle. However, the prior art of record does not disclose or render obvious all of the details of the limitations of independent claim and, in particular, the inner casing for being completely contained within a pancake shaped second cavity, the second cavity defined by walls of a pressure resistant outer casing, wherein the outer casing is resistant to a pressure difference between the high first pressure inside the second cavity and a low third pressure outside the outer casing, and wherein a pressurized duct is formed inside the second volume between the walls of the outer casing and the cylindrical wall of the inner casing.
